TRENDS IN
ANALYTICAL
CHEMISTRY

Volume 10

REFERENCE EDITION
1991

CONTENTS

JANUARY, 1991

monitor
'Hot' topics in global analytical chemistry research: 1981–1990, *by T. Braun and A. Schubert* 1

meeting reports
8th International symposium on chromatography (ISC), *by A. J. J. Debets* 4
International symposium on capillary electrophoresis, *by M. J. Dunn* 6
International conference on ion-exchange processes, *by A. Dyer* 7

computer corner
Second-order catalytic electrode reactions at amperometric biosensors. The application of polynomial and B-spline interpolation to the description of cyclic voltammetric features, *by B. Speiser* 9

observer
Recent developments in water quality monitoring by flow injection analysis, *by M. Trojanowicz, R. L. Benson and P. J. Worsfold* 11

trends
Drug determination in serum by liquid chromatography with restricted access stationary phases, *by J. Haginaka* 17
Screening in gas chromatography with atomic emission detection, *by J. J. Sullivan* 23
Assessment of stress in plants by analysis of photosynthetic performance, *by J. F. H. Snel, O. van Kooten and L. W. A. van Hove* 26

FEBRUARY, 1991

meeting report
EUROANALYSIS VII, 7th European conference on analytical chemistry 31

feature
The application of chemical, physical, and materials analytical methods to high-T_c superconductor ceramics, *by F. Chen, R. Hidalgo, T. R. Gilbert, R. S. Markiewicz and B. C. Giessen* 35

trends
High-resolution physisorption techniques for the characterization of adsorbents and catalysts, *by K. K. Unger and H. Reichert* 44
Guidelines for bioanalysis using column liquid chromatography, *by H. Lingeman, R. D. McDowall and U. A. Th. Brinkman* 48
Techniques for NMR imaging of solids, *by J. B. Miller* 59
Supercritical fluid extraction and chromatography: potential and limitations, *by H. Engelhardt and A. Gross* 64
Inductively coupled plasma mass spectrometry in hyphenation: a multielemental analysis technique with almost unlimited potential, *by D. Beauchemin* 71

MARCH, 1991

meeting reports

3rd International symposium on analytical methods in biotechnology, *by G. Marko-Varga and L. Gorton* **78**
12th International symposium on capillary chromatography, *by Y. Hirata* **80**
4th International colloquium on solid sampling with atomic spectroscopy, *by R. F. M. Herber* **82**
4th Symposium on automated analysis, *by D. C. Ashworth* **82**

trends

The application of electrospray mass spectrometry to the characterisation of abnormal or variant haemoglobins, *by R. W. A. Oliver and B. N. Green* **85**
Infrared detection in supercritical-fluid chromatography using xenon, *by M. A. Healy, T. J. Jenkins and M. Poliakoff* **92**
Pre- and post-column derivatization reactions for liquid chromatography–electrochemistry, *by S. M. Lunte* **97**
Recent advances in the analysis of vitamin D metabolites, *by K. Shimada and N. Kobayashi* **103**

APRIL, 1991

monitor

Recent trends in the instrumental analysis of geochemical materials, *by T. Braun and S. Zsindely* **106**

meeting report

AOAC Europe regional symposium — analytical science in Europe: elimination of barriers, *by M. C. Walsh* **108**

computer corner

Decision trees for rapid prototyping of expert systems, *by P. Vankeerberghen and D. L. Massart* **110**

trends

Integration of separation and detection in continuous-flow systems, *by M. D. Luque de Castro and M. Valcárcel* **114**
Chromatography of metals — current achievements and future potential, *by K. Robards and P. J. Worsfold* **121**
Porphyrins as reagents for trace-metal analysis, *by M. Tabata and M. Tanaka* **128**
Detecting DNA bands in electrophoresis gels with chemiluminescence, *by M. E. Casperson, R. W. Coughlin and E. M. Davis* **133**

MAY, 1991

meeting report

HPCE '91, 3rd International symposium on high-performance capillary electrophoresis, *by A. E. Bruno* **137**

computer corner

CANOM: a computer program for ^{13}C NMR analysis of organic mixtures, *by B. S. N. Murty, P. J. Reddy, S. Husain and R. N. Rao* **139**

trends

Micromachining of monocrystalline silicon and glass for chemical analysis systems. A look into next century's technology or just a fashionable craze? *by A. Manz, J.C. Fettinger, E. Verpoorte, H. Lüdi, H. M. Widmer and D. J. Harrison* **144**
Rapid signal processing techniques for Fourier transform infrared remote sensing, *by G. W. Small, T. F. Kaltenbach and R. T. Kroutil* **149**
Structure thermodynamic and transport properties of biological liquid crystals studied by X-ray methods, *by M. Caffrey* **156**
Polymer coating of surfaces in column liquid chromatography and capillary electrophoresis, *by G. Schomburg* **163**

JUNE/JULY, 1991

meeting report

42nd Pittsburgh conference and exposition on analytical chemistry and applied spectroscopy, *by C. Cohen, B. Davis, J. Jackovitz, M. Preigh, H. Tsai and E. Wise* **170**

4th IAEAC Hans Wolfgang Nürnberg memorial workshop on toxic metal compounds and 2nd IAEAC soil residue analysis workshop, *by E. Merian* **172**

computer corner

Software for finding groups in data, *by P. J. Rousseeuw* **175**

trends

A road less travelled: normal phase microbore liquid chromatography–mass spectrometry using direct liquid introduction, *by W. A. Garland, C. A. Huselton, F. Kolinsky and D. J. Liberato* **177**

Application of waveguiding in solutions for absorption and fluorescence spectrometry, *by K. Fujiwara and S. Ito* **184**

Adsorption processes during crystalline growth: an analytical tool, *by F. Grases and J. G. March* **190**

Proximate analysis of coal, oil shale, low quality fossil fuels and related materials by thermogravimetry, *by S. St. J. Warne* **195**

AUGUST, 1991

computer corner

Estimating enzyme parameters without iteration, *by M. E. Jones* **200**

feature

Instrumentation chemistry — a versatile strategy, *by Y. Gohshi* **202**

trends

Biomembrane mimetic sensing chemistry, *by K. Odashima, M. Sugawara and U. Umezawa* **207**

Analytical applications of synchrotron radiation at the Photon Factory, *by A. Iida* **215**

Solid-state NMR in Japan, *by T. Terao* **222**

Intercalation on DNA by synthetic molecules, *by M. Takagi, M. Maeda and S. Takenaka* **226**

SEPTEMBER, 1991

meeting reports

21st IAEAC annual symposium on environmental analytical chemistry, and the 3rd metal speciation workshop in soils, *by E. Merian* **229**

2nd International symposium on the interface between analytical chemistry and microbiology, *by P. Sundin* **231**

computer corner

Fast data-acquisition based on a novel concept in optical spectroscopy, *by W. Schmidt* **233**

feature

Basics of video image analysis, *by D. Bertrand, M.-F. Devaux and P. Robert* **237**

trends

Radon and radon progeny measurements, *by P. K. Hopke and P. Wasiolek* **243**

Confocal Raman microspectroscopy in biology: applications and future developments, *by G. J. Puppels, C. Otto and J. Greve* **249**

Genetic algorithms for large-scale optimization in chemometrics: an application, *by C. B. Lucasius and G. Kateman* **254**

The use of membrane electrodes for the determination of inorganic species in pharmaceutical analysis, *by V. V. Coşofreţ* **261**

OCTOBER, 1991

monitor
Capillary electrophoresis: prospects for growth, *by T. Braun and S. Nagydiósi-Rósza* **266**

computer corner
Computer-assisted rating of gasoline octane, *by B. G. Rohrback* **269**

trends
Quantitative aspects of capillary electrophoresis, *by D. M. Goodall, S. J. Williams and D. K. Lloyd* **272**
Thermal analysis of fullerenes, *by P. K. Gallagher, Z. Zhong, J. Twu and S. M. Kane* **279**
Latent variables and cluster analysis of receptor protein sequences, *by P. J. Lewi and H. Moereels* **283**
Enzymes as analytical tools, *by G. Marko-Varga and E. Dominguez* **290**
Drug membrane sensors and their pharmaceutical applications, *by V. V. Coşofreţ* **298**

NOVEMBER/DECEMBER, 1991

meeting report
3rd Workshop on chemistry and fate of modern pesticides, *by C.A. Corvi* **302**

feature
Strategies for sustainable socio-economic development in environmental planning, *by F. Langeweg* **303**

trends
Chemical sensors for environmental analysis, *by R. Niessner* **310**
Sample handling strategies for the analysis of non-volatile organic compounds from environmental water samples, *by M.-C. Hennion* **317**
Applications of gas chromatography–mass spectrometry in monitoring environmentally important compounds, *by D. Barceló* **323**
Liquid chromatography–mass spectrometry — a new window for organic environmental analysis, *by M. A. Brown, R. D. Stephens and I. S. Kim* **330**
Vibrational spectroscopy for chromatographic detection in environmental analysis, *by Y. Soma* **337**
Certified reference materials for the quality control of measurements in environmental monitoring, *by E. A. Maier* **340**
